## C Operations

### Before you clean

1. Plan activities to give carpet time to dry.

8. Empty Dirty Water Tank when dirty water reaches FULL line, or when Formula and Water Tank is empty.

## C-3 Area rug cleaning

**Important! Please check manufacturer's tag before cleaning area rugs for any specialized cleaning instructions. We do not recommend deep cleaning delicate, silk, wool, antique, or area rugs without a manufacturer's tag.**

When cleaning area rugs, place rug on a sealed surface and test a small, inconspicuous area for colorfastness. Your carpet cleaner should not be used on unsealed surfaces.

Follow carpet cleaning instruction in section C-2. Keep foot of cleaner perpendicular to rug's edge with each cleaning pass to prevent damage.

## ATTENTION

Some Berber carpets have a tendency to fuzz with wear. Repeated strokes in the same area with an ordinary vacuum or deep cleaner may aggravate this condition.

# D Care, Maintenance, & Storage

## D-1 Machine storage

For best results, a few simple steps can assure your machine is well maintained after your cleaning is complete.

**1.** Wrap Power Cable around Quick Release Cable Wrap on side of machine.

**2.** Wipe all surfaces with a soft cloth. Store cleaner upright in a protected, dry area.

**NOTE: You may have cleaning solution remaining in the Formula & Water Tank. You may store your machine this way for the next cleaning task, but never keep dirty water in the Dirty Water Tank.**

To reduce the risk of electric shock, turn power switch off and disconnect plug from electrical outlet before performing maintenance or troubleshooting checks.

Do not store unit where freezing may occur. Damage to internal components may result.
